Professional Summary

Associate Software Engineer with 2 years of industry experience in backend development and test automation, with working exposure to frontend integration. Proficient in Python (Flask), Java Spring Boot, and AWS-based systems. Hands-on experience building REST APIs, designing database schemas, and authoring end-to-end automation test suites using Python Playwright, with familiarity across the full request lifecycle from UI to database. Seeking a Backend Developer role to deliver scalable, well-tested, and reliable software solutions.

Technical Skills

Languages: Python, Java, SQL, JavaScript (basic), HTML, CSS
Backend Frameworks: Flask, Spring Boot, Django
API Development: REST API Design, Microservices Architecture, Authentication & Authorization
Test Automation: Python Playwright, End-to-End Testing, Regression Automation
Databases: PostgreSQL, MySQL, Query Optimization, Schema Design
Cloud & DevOps: AWS (S3, ECS, ECR, RDS), Git, GitHub, TeamCity

Experience

RSquareSoft Technologies (Client – ZS Associates) **Jan 2025 – Present**
Associate Software Engineer *Onsite*

- Developed and maintained RESTful backend services using **Python Flask**, integrating business logic with PostgreSQL and serving data to frontend-facing interfaces.
- Built end-to-end automation test suites using **Python Playwright** with reusable fixtures and utilities, covering critical workflows across frontend and backend layers.
- Contributed to small frontend features using **Angular**, supporting API integration and consistent data flow between layers.
- Collaborated with senior engineers to triage failing test suites, identifying root causes and restoring stability across release cycles.

RSquareSoft Technologies **Sept 2024 – Present**
Associate Software Engineer *Onsite*

- Developed backend services and REST APIs using Java Spring Boot and PostgreSQL.
- Optimized SQL queries and database schemas for performance improvements.
- Worked with AWS services such as S3, ECS, ECR, and RDS.

RSquareSoft Technologies **April 2024 – Sept 2024**
Intern Software Engineer *Onsite*

- Assisted in backend and data-related development tasks in a microservices environment.
- Supported API development and database operations.

Projects

Multi-Tenant SaaS Bootstrapper **May 2026**
Flask, PostgreSQL, React (Vite))

- Implemented subdomain-based tenant routing with SQLAlchemy-level row-level security, auto-scoping every query to the active tenant via a `ContextVar` interceptor.
- Built tenant provisioning, JWT auth, plan-tiered feature flags, and a superadmin panel with cross-tenant metrics and soft-delete over a shared PostgreSQL schema.
- Developed a React frontend with a multi-step onboarding wizard, flag-gated UI components, and a superadmin tenant-switcher.

ValetPlus **Jan 2025**
Data-driven valet management platform

- Designed backend data flows to track valet events and operational metrics.
- Processed transactional data to generate operational insights.
- Integrated AWS services for scalable data storage and deployment.

Education

Gharda Institute of Technology **2020 – 2024**
B.E. in Computer Engineering *CGPA: 7.44 / 10*

Certifications

Python and Flask Framework **2025**
Udemy
Full Stack JAVA **2024**
Symbiosis Skills & Professional University × Capgemini
JAVA Programming - Beginner to Master **2023**
AWS Academy

Extra-Curricular Activities

- Received the **Star Performer Award** from RSquareSoft Technologies for outstanding contribution in Q2 2025.
- Mentored Java Spring Boot and DevOps interns on backend development and DevOps fundamentals as personal initiative (2025).
